About Planters II

Produced in the Rocky Mountains of Colorado, Planters II is granulated for easy application and storage. Tested by several universities, with **proven plant availability** and agronomic value, it is a metamorphosed, freshwater evaporate.

About US SOIL

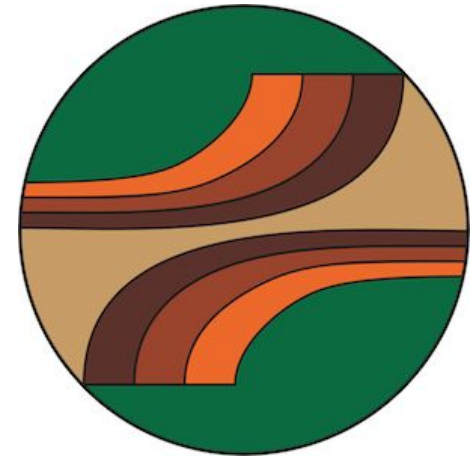

Established in 1947 U.S. Soil, a family-owned and operated business, works tirelessly to promote commercial, sustainable agriculture, and organic farming.

Today, there are many mineral supplements on the market, but few provide the ideal mineral combination U.S. Soil is able to provide with **Planters II**.

By choosing U.S. Soil, you are choosing to use a company that has the experience and the products to build your foundation for the future.
